SUMMARY

Aspiring DevOps Engineer with hands-on experience in AWS, Docker, Kubernetes, and CI/CD through internships and self-driven projects. Skilled in automating deployments, managing cloud infrastructure, and building scalable apps using Python and Flask. Eager to contribute as a fresher to a fast-paced, cloud-focused team.

EDUCATION

National Institute of Electronics and Information Technology

2022 – 2026

B.Tech - Electronics System Engineering - CGPA - 8.34

Chhatrapati Sambhajnagar, Maharashtra

EXPERIENCE

DevOps Intern at Elevate Labs 

August 2025 - September 2025

Role - DevOps Intern

Remote

- Collaborated with the team on projects covering CI/CD pipelines, infrastructure automation, and cloud deployment workflows.
- Gained hands-on exposure to Docker and Kubernetes for containerization and orchestration of applications.
- Worked with Jenkins to build and automate CI/CD pipelines, streamlining build and deployment processes.

Research Intern - 5G/6G at Hnnoix India Pvt. Ltd. 

August 2025 - October 2025

Role - Research Intern

Remote

- Attended structured training sessions covering 5G/6G network architecture, protocols, and emerging wireless technologies.
- Built theoretical understanding of next-generation communication systems and their applications in modern telecom infrastructure.

PROJECTS

MEAN Stack DevOps Deployment  | Docker, AWS EC2, Nginx, GitHub Actions, CI/CD

- Deployed a production-ready MEAN stack application on AWS EC2 using Docker and Nginx, reducing manual setup time.
- Automated Docker image build, test, and deployment to AWS EC2 using GitHub Actions CI/CD pipeline.

Incident Management System  | Flask, SQLite, Docker, Flask-Mail

- Developed a secure web application for managing incidents with authentication and automated email alerts.
- Integrated Flask-Mail (Gmail SMTP) to notify users on incident creation, assignment, and resolution, with session-based Signup/Login/Logout access control.

AWS 3-Tier Web Application  | AWS EC2, Load Balancer, RDS, PHP

- Deployed a three-tier architecture on AWS using EC2 (Apache/PHP), Application Load Balancer, and RDS MySQL.
- Connected the PHP application to RDS database and tested load balancing across multiple servers for high availability.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Lambda, RDS, CFN, ALB), Vercel, Supabase

CI/CD & DevOps: Docker, Docker Compose, Kubernetes, GitHub Actions, Jenkins, Git

Programming Language: Python, C

OS & Networking: Linux (Ubuntu, Red Hat), Nginx, Bash Scripting

Frameworks and Databases: Flask, MySQL, SQLite, MongoDB, PostgreSQL

Exposure To: Terraform, Ansible, Prometheus, Grafana

AI Tools & Coding Assistants: Antigravity CLI, GitHub Copilot, Claude, ChatGPT

CERTIFICATIONS

• Deloitte Australia Technology Job Simulation - Forage 

October 2025

• Corizo Data Science Training 

August 2023 - September 2023

• AWS Certified Solutions Architect Professional - Cloudlearning
