PROFILE

B.Tech graduate in Electronics System Engineering with hands-on experience in AWS, Docker, Kubernetes, and GitHub Actions CI/CD. Delivered real-world projects including multi-tier AWS architectures and containerized full-stack deployments. Seeking a DevOps / Cloud Engineer role to contribute to infrastructure automation, reliability, and scalability.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Lambda, RDS, CFN, ALB), Vercel, Supabase

CI/CD & DevOps: Docker, Docker Compose, Kubernetes, GitHub Actions, Jenkins, Git

Programming Language: Python, C

OS & Networking: Linux (Ubuntu, Red Hat), Nginx, Bash Scripting

Frameworks and Databases: Flask, MySQL, SQLite, MongoDB, PostgreSQL

Exposure To: Terraform, Ansible, Prometheus, Grafana

PROJECTS

MEAN Stack DevOps Deployment (Docker + AWS + CI/CD) ([GitHub](#))

- Deployed a production-ready MEAN application on AWS EC2 using Docker and Nginx, reducing manual setup time.
- Automated Docker image build, test, and deployment to AWS EC2 using GitHub Actions CI/CD.

CI/CD Pipeline with Node.js, Docker & GitHub Actions([GitHub](#))

- Set up a GitHub Actions to automatically install dependencies, run tests and build the project on every push to main.
- Built and deployed versioned Docker images to DockerHub using GitHub Secrets, following CI/CD security best practices.

Incident Management System (Flask, SQLite, Docker)([LINK](#))

- Developed a secure web app for managing incidents with authentication and email alerts.
- Added a simple Signup/Login/Logout system using sessions to make sure only logged-in users can access the app.
- Integrated email alerts using Flask-Mail (Gmail SMTP) to notify users when an incident is created, assigned, or resolved.

AWS 3-Tier Web Application (Load Balancer + EC2 + RDS + PHP)([GitHub](#))

- Deployed a three tier architecture on AWS using EC2 (Apache/PHP), Application Load balancer and RDS MySQL.
 - Connected the PHP app to RDS database and tested load balancing across multiple servers for high availability.
-

INTERNSHIPS

Elevate-Labs | DevOps Intern

- Automated CI/CD pipelines using GitHub Actions and Docker, reducing manual deployment effort for the team.
- Optimized cloud deployment workflows, contributing to faster release cycles and improved build reliability.

Hnnoix India Pvt. Ltd. | Research Intern (5G/6G)

- Researched 6G and next-gen wireless technologies, evaluating RAN advancements and deployment implications.
-

EDUCATION

B.Tech in Electronics System Engineering | NIELIT (2022-2026)| CGPA - 8.37

XII (HBSE) | V.B.N. Sr. Sec. School | 94%

CERTIFICATIONS

- AWS SAA Solution Architect Professional Batch – Pursuing
- Deloitte Australia Technology Job Simulation – Forage (Oct 2025)([CERTIFICATE](#))
- Corizo Data Science Training (Aug 2023 – Sep 2023)([CERTIFICATE](#))
